For use with children from birth and up.

INSTRUCTION MANUAL

PERFECT BEGINNINGS BABY CARE KIT

Thank you for buying the Perfect Beginnings baby Care Kit from Summer Infant. This comprehensive kit contains essential health and hygiene items for your baby. Convenient storage case keeps these items organized and easily accessible.

⚠ WARNING:

DO NOT TIE MEDI-DISPENSER AROUND CHILD'S NECK AS IT PRESENTS A STRANGULATION DANGER.

⚠ CAUTION:

The components of this product, except for the teether, are not toys. Do not allow children to play with them.

BRUSH:

Soft brush bristles are gentle on baby's scalp. Handle design with soft grip texture is easy for toddlers to hold and use.

To use:

- Wash brush before using.
- Untangle hair from the roots out. Keep a hand on the roots while brushing to avoid pulling on child's scalp.
- Encourage your toddler to try brushing his or her own hair with your assistance (approximately 3 years old).

To clean: Wash with mild soap and warm water. Rinse thoroughly; air dry.

NAIL CLIPPERS:

This newborn size nail clipper's handle rotates 360 degrees so you can safely trim nails from any angle. Wash before initial use.

Note: Do not clip too close to baby's skin. We recommend clipping baby's nails while he or she is sleeping.

To clean: Sterilize with isopropyl rubbing alcohol and rinse in warm water. Wipe dry.

MEDICINE SYRINGE:

Easily dispense and measure medicine.

To use: Clean before first use. Push the inner half of the syringe all the way in and place the tip of the syringe into the liquid medicine. Pull the inner half out until the medicine reaches the correct marked dosage. Make sure your child is elevated to avoid choking and then place one finger inside their mouth and gently pull the cheek outward. Place the syringe toward the back of the cheek (not toward the back of the mouth to avoid gagging) and push down on the inner plunger to dispense the liquid.

To clean: Remove the inner plunger and wash both halves in warm, soapy water. Air dry. Top rack dishwasher safe. Do not place in boiling water.

5 EMERY BOARDS:

- Gently glide across baby's fingernails to smooth them.

10 ALCOHOL SWABS:

- Use to clean and disinfect.

NASAL ASPIRATOR:

To use:

- Wash before initial use, do not boil.
- Hold baby upright.
- While squeezing the aspirator bulb, gently place the tip of the aspirator into baby's nostril and tilt it to the side. Never point the tip directly in the center of the nostril. Be careful not to over-insert the aspirator.
- Slowly release the bulb allowing the suction to draw the mucus out of baby's nostril.
- Repeat with other nostril.
- Repeat as necessary until baby's experiences relief from congestion.

To clean: Put the aspirator under soapy, warm water. Squeeze and release the bulb several times to clean the inside of the bulb. Rinse with warm water. Squeeze out all excess water from the bulb.

PACIFIER MEDICINE DISPENSER:

The Medicine Dispenser provides parents with a convenient way to dispense medicine to their child. The unique design reduces the likelihood of spillage and helps ensure proper dosage. The soft, contoured applicator is comfortable for baby.

To use: Twist the clear cap counterclockwise and pivot open. Pour in the desired amount of liquid using the dosage marks. Holding the cap upright, pivot the pacifier shield down on the cap, and then twist clockwise to close. Place the medicine dispenser into baby's mouth. Works best when the child is in a reclined position.

To clean: Immediately before initial use and after each use, open the cap and wash with hot soapy water. Rinse thoroughly. Dishwasher safe.

CAUTION: This product is not a toy. Only use as a medecine dispenser, not as a regular pacifier. Adult supervision is required. Store away from child's reach. Keep all medications out of child's reach at all times. Inspect before and after every use. Any tears in the nipple can lead to separation of a piece and present a possible choking hazard. Discontinue use if any tear or crack appears. Test strength by pulling on the nipple portion before each use. Do not store in direct sunlight.

TEETHER:

To clean: Rinse under clean, warm water before first use and after each use. Note: Do not boil.

STORAGE CASE:

• Keep items organized with the convenient storage case.

To clean: Surface wash with mild soap and warm water. Rinse thoroughly; air dry.

DIGITAL THERMOMETERS:

For complete instructions for use and care, please see separate instruction manuals enclosed.

FINGERBRUSH & CASE:

This unique item fits compactly into its own sanitary case. Whether a parent is massaging sore teething gums on the go, or maintaining a good oral brushing hygiene after eating out, this wonderful little product fills the need.

To use:

• Clean infant finger toothbrush before first use and after each use.

• Place on parent's fingertip.

• Gently clean and massage gums for emerging teeth.

To clean: Wash in warm water using mild liquid soap. Rinse throughly; air dry.

63 PAGE ESSENTIAL GUIDE:

• Johnson's® 63 page essential guide for parents from experts.
