

INSTRUCTION MANUAL

6-PIECE ORAL CARE SET

04500

Please read the following instructions and warnings carefully.

CAUTION: THIS PRODUCT IS NOT A TOY. ADULT SUPERVISION REQUIRED.

Colors and styles may vary.

For use with children from birth and up.

Thank you for buying the Deluxe Oral Care Kit from Summer Infant. This comprehensive kit is filled with essential items for your baby's oral care needs. Please read the following instructions for use and care.

HELPFUL TIPS:

- Before your child's first tooth comes in: remove plaque by gently cleaning baby's gums with a small, dampened, soft cloth, gauze pad or the included finger toothbrush after each feeding.
- Tooth brushing should be made part of a daily routine, such as before bed and/or in the morning.
- Use a step stool to help your child reach the sink.
- Encourage your child to watch himself in the mirror.
- Set a time limit (about 2-3 minutes) to ensure your child has brushed thoroughly.
- Toothbrushes should be replaced every 4 months.
- For questions about your child's oral health and hygiene, be sure to contact your family dentist.

ANGLED MIRROR

- Clean angled mirror before first use and after each use.
- Inspect your child's tongue, gums and teeth on a regular basis.
- Encourage your child (after child reaches 3 years of age) to look at and inspect their own mouth. This will teach life-long proper oral hygiene to your child.
- If questions about your child's oral health and hygiene arise, be sure to contact your family dentist.

GUM MASSAGER

- Clean gum massager before first use and after each use.
- As your child's first tooth comes in: soothe baby's painful gums by gently stimulating them with the gum massager.
- As your child's first tooth emerges: massage gums to ease tooth emergence and relieve discomfort.

WARNING:

- The components of this product, except for the teether, are not toys. Do not allow children to play with them.
- Cool teether only in a domestic refrigerator, do not place in the freezer compartment.

FINGER TOOTHBRUSH AND MASSAGER

- Clean finger toothbrush and massager before first use and after each use.
- Fits on parent's fingertip for ease of use with baby. Maneuvers easily.
- Use to clean and massage gums and emerging teeth.

WATER-FILLED TEETHER

- Clean water-filled teether before first use and after each use.
- Cool teether in refrigerator.
- Always keep teether refrigerated for maximum convenience.
- Allow baby to chew on teether to soothe gums during teething and tooth emergence.

TOOTHBRUSH

- Clean toothbrush before first use and after each use.
- When your child's first tooth emerges: brush tooth with a dampened toothbrush (do not use toothpaste until child is at least 2 years old). Continue to clean gums.
- When child is about 12 months old: with your assistance, allow her to try brushing her teeth with a dampened toothbrush. Practice an up and down motion.
- When child is about 3 years old: encourage child to brush by himself, with your supervision.
- Help your child when needed. Use only a pea-sized amount of toothpaste. **DO NOT ALLOW CHILD TO SWALLOW TOOTHPASTE.**
